Dear Customers;

We have been taking confident steps forward, making new investments and growing in order to become the leading firm of our sector and ensure sustainability of such a leading position in the business, which was commenced with the entrepreneurial spirit of my grandfather Hacı Hasan Yıldız, which was maintained by 4 generations and in which my children are actively involved today.

We are aiming to present our the products to customers with the best quality rich varieties from the nearest point thanks to our technological end equipment pool and new investments for the factory.

Our aim is to lead for the innovations by being the first brand that comes to mind in our sector where the competition is intense and tough. We are forming our future plans on the basis of this philosophy.

While our background enables us to act as the best player in the forestry products, our investments in other sectors are still going on. We are aiming at reaching the highest points in the world ranking for the other forestry products of which we make of chipboard - the raw material of the furniture production and MDF by adopting the philosophy of gaining together - in order to grow with our customers with both our production capacity and brand values: because we think that it is our duty to increase our contributions to the country's economy by demonstrating the same success not only in domestic market but also in foreign countries.

In addition to our trade ethics which we have taken over from my grandfather, our knowledge on business which we have obtained from my father, and the vision of my children, our staff and customers have also provided many contributions. From now on, we wish to develop altogether with consensus and cooperation for success.
